

Syed Muhammad Ali Hussain

Full Stack Flutter Developer

+92-343-1670848 | ali422600@gmail.com | Lahore, Pakistan | Open to Relocation

TECHNICAL SKILLS

Mobile Development:	Flutter, Dart, iOS, Android, Cross-Platform, Material Design, Cupertino, Custom Widgets, Platform Channels, Responsive Design
Full Stack & Cloud:	Firebase (Auth, Firestore, Cloud Functions, FCM, Crashlytics), Node.js, Express, RESTful APIs, GraphQL, WebSockets, Real-time Architecture
Architecture:	Clean Architecture, MVVM, Repository Pattern, SOLID Principles, Dependency Injection, Modular Architecture, Offline-First Design
State Management:	GetX, Riverpod, Bloc/Cubit, Provider, Redux, Hydrated Bloc
Databases & Storage:	Firestore, SQLite, Hive, ObjectBox, MongoDB, Secure Storage
Payments & Subscriptions:	Stripe, Apple Pay, Google Pay, RevenueCat, In-App Purchases
Integrations:	Google Maps, Zego Live Streaming SDK, AWS SDK, Firebase SDK, Twilio, Google ML Kit, Pusher
Testing & DevOps:	Unit Testing, Widget Testing, Integration Testing, TDD, CI/CD, Fastlane, Codemagic, Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Senior Flutter Developer — Octet Solutions, Lahore | Sep 2024 – Present

Architected and maintained Efone, a full-stack SIP-based real-time calling and chat platform. Took full ownership of design decisions and delivered features across the complete software development lifecycle.

- Implemented offline-first architecture using ObjectBox for local data storage, ensuring seamless functionality without active internet.
- Designed and built background service system for reliable incoming SIP calls and messages in closed/background app states.
- Built API interceptor layer with token refresh, retry logic, and centralized error handling, improving request reliability.
- Refactored legacy codebase using SOLID principles and clean architecture, boosting maintainability and test coverage.
- Led code reviews, established bug tracking workflows, and mentored junior developers on Flutter best practices.

Flutter Developer (Full Stack Focus) — Cybermeteors, Lahore | Sep 2022 – Aug 2024

Designed and delivered 7 production mobile applications across security, healthcare, legal, and entertainment sectors with significant full-stack involvement.

- **Guard 360 Manager (B2B Security Platform):** Real-time GPS tracking via Google Maps, geofencing alerts, incident reporting with media upload, shift management. Built both Flutter frontend and Firebase Cloud Functions backend.
- **Vardstod Medical App (HIPAA-Compliant):** Encrypted data storage, secure patient-provider messaging, appointment scheduling, e-prescription management with Firestore security rules.
- **Bingo Play & Dremento (Entertainment):** Zego Live Streaming SDK integration, RevenueCat subscription management, real-time chat with Pusher.
- Implemented real-time chat infrastructure (Pusher, WebSocket/Socket.IO) supporting text, image, video, audio with typing indicators and read receipts.
- Integrated multiple payment gateways (Stripe, Apple Pay, Google Pay) with secure transaction processing and webhook handling.

Flutter Developer — Techquick, Lahore | Feb 2022 – Aug 2022

Developed and deployed 6 mobile applications across logistics, dating, parking, and attendance management sectors. Strong startup mentality with focus on rapid iteration and MVP delivery.

- **Steve Rams Junk Disposal (Construction-Tech Logistics):** Scheduling, Google Maps route optimization, real-time driver tracking, Stripe payment integration.
- **Utama Parking App (Real Estate Tech):** Real-time parking availability, reservation system, QR code scanning, payment integration.
- **Tibo Dating App:** Profile matching, Twilio-powered messaging, location-based discovery, Firebase FCM push notifications.

- Built AI-powered facial recognition attendance system using Google ML Kit Face Detection API with Firebase Firestore synchronization.
- Leveraged AWS SDK for cloud storage and file management across logistics and parking applications.
- Established reusable component library with custom widgets and shared packages for design consistency and accelerated development.

KEY ACHIEVEMENTS & EDUCATION

- Delivered 15+ production applications with strong hands-on involvement across full stack (Flutter + backend/Firebase).
- Specialized in field-services and construction-tech apps with real-world GPS tracking, geofencing, and route optimization.
- Implemented enterprise-grade security patterns (HIPAA compliance, encrypted storage, OAuth 2.0, JWT).
- Optimized app stability using Firebase Crashlytics and performance profiling, reducing production issues by 40%.
- **Bachelor of Science in Computer Science:** Virtual University of Pakistan, Lahore | Graduated Nov 2021
